

# WHITEPAPER

## INTRODUCTION :

QUBIK is the brainchild of extraordinary people with a vision to extend the benefits of gaming to individuals. A vision born out of the willingness to create growth opportunities for millions who are waiting to participate in this fast-growing web 3.0 gaming ecosystem, but have been held back because of the costs involved, technical support and maintenance. With Anconnect, those who aspire to be a part of the growing gaming world can do so with as little as \$100.

With a global mindset and reach, QUBIK will lead the universal crypto gaming lovers community. The project will develop web 3.0 gaming farms with a hybrid state-of-the-art technology to overcome the significant problem faced by European and Asian HPC facilities

QUBIK's gaming lovers community will use less electric energy compared to European and Asian infrastructure that earn cryptocurrencies across the globe.

## OUR PURPOSE :

**The future of Metaverse Gamified, Anconect is a long-term play.**

The Metaverse is poised to significantly transform gaming, offering a more immersive and interactive experience through technologies like VR and AR. This transformation includes enhanced social interaction, new forms of gameplay, and innovative monetization models, including play-to-earn and NFTs. While challenges around infrastructure and governance remain, the Metaverse's potential to reshape how we play, interact, and even work is undeniable.

Concerts, festivals, and other social gatherings will take place within the Metaverse, offering unique and engaging experiences.

The Metaverse will offer new opportunities for players to earn real-world value through gameplay, such as through play-to-earn models and virtual economies.

## VISION :

To empower every individual and every organization in the blockchain ecosystem to achieve more through a bright and progressive mining framework. To provide value to the community through content and experiences like NFTs that aid the development of the Metaverse.

## MISSION :

Our mission is to extend the rewards of mining to a global community of individuals driven by the potential of the bright mining future. We aim to make this possible through our state-of-the-art infrastructure capabilities by building an open and shared community. Our ambition is to reach a target of mining 5 Bitcoin daily in a span of one year. Imagine a time when this aspiration is achieved, and it supports \$QBK liquidity and market cap. As phases progress, we aim to create a marketplace that integrates NFTs, the Metaverse, thereby developing a cross-chain ecosystem.
