INTRODUCTION

QUBIK is the brainchild of extraordinary people with a vision to extend the benefits of gaming to individuals. A vision born out of the willingness to create growth opportunities for millions who are waiting to participate in this fast-growing Web 3.0 gaming ecosystem, but have been held back because of the costs involved, technical support and maintenance. With Anconnect, those who aspire to be a part of the growing gaming world can do so with as little as \$100.

With a global mindset and reach, QUBIK will lead the universal crypto gaming lovers community. The project will develop Web 3.0 gaming farms with a hybrid state-of-the-art technology to overcome the significant problem faced by European and Asian HPC facilities.

QUBIK's gaming lovers community will use less electric energy compared to European and Asian infrastructure that earn cryptocurrencies across the globe.

VISION

To empower every individual and every organization in the blockchain ecosystem to achieve more through a bright and progressive mining framework. To provide value to the community through content and experiences like NFTs that aid the development of the Metaverse.

MISSION

Our mission is to extend the rewards of mining to a global community of individuals driven by the potential of the bright mining future. We aim to make this possible through our state-of-the-art infrastructure capabilities by building an open and shared community. Our ambition is to reach a target of mining 5 Bitcoin daily in a span of one year. Imagine a time when this aspiration is achieved, and it supports \$QBK liquidity and market cap. As phases progress, we aim to create a marketplace that integrates NFTs, the Metaverse, thereby developing a cross-chain ecosystem.
